CONTENTS FOR
Heat Transfer Research
Volume 24, Nos. 1-8, 1992

Number 1

1 Laminar Free Convection between Cylinders with Horizontal Temperature Stratification
B.P. Gerasimov, Yu.A. Yermakov, and A.G. Churbanov

24 Heat Transfer and Friction on Surfaces Contoured by Spherical Depressions
V.N. Afanas'yev and Ya.P.Chudnovskiy

106 Heat Transfer in Small Gaps and Ceramic-Ceramic Contact Zones at Large Heat Large Heat Fluxes
Ya.A. Bal'tsevich, R.A. Bolshaytis and N.A. Rubtsov

Number 2

139 Heat and Mass Transfer on Permeable Surfaces Involving Phase Transitions and Chemical Reactions
V.I. Terekhov

172 Heat Transfer Limitation in Small-Diameter Heat Pipes
S.V. Konev and Alselman Assad

179 Three-Phase Single-Component Channel Flows
V.A. Borodulya, S.K. Dymenko, G.I. Zhuravskiy, A.A. Kurilenko, V.I. Pakhomov, and A.I. Podberezskiy

184 Numerical Simulation of Convective Flows in a Gap Between Isothermal Eccentric Cylinders
B.P. Gerasimov, Yu.A. Yermakov, and A.G. Churbanov

208 Prevention of Condensation of Moisture in Pipe Transport of Particulate Solids in Gas Suspensions
Yu.G. Klimenko, L.F. Voronina, and D.I. Kir'yakov

214 The Effect of a Transverse Magnetic Field on the Hydrodynamics of a Liquid-Metal Coolant
M.Ye. Lebedev, E.V. Firsova, V.A. Divavin, and A.D. Aleksandrovich

226 Heat Transfer to Liquid Metal in a Tube Exposed to a Transverse Magnetic Field
M.A. Gotovskiy and E.V. Firsova

234 Pressure Drop in Eutectic Lead-Bismuth Alloy Flow Through Circular Tubes in a Transverse Magnetic Field
B.F. Gromov, A.K. Papovyants, Yu.I. Orlov, and P.N. Martynov

245 Experimental Studies with a Tubular Liquid-Metal Blanket for the ITNR-ETR-Type Reactor
Ye.V. Muraviyov

265 Neutron and Physical Properties of the Blanket of an Experimental Thermonuclear Reactor
A.I. Kasatkin, V.M. Koren', A.V. Saltykovskiy, and A.M. Shapiro

M.Ye. Lebedev, E.V. Firsova, V.A. Divavin, and A.D. Aleksandrovich

226 Heat Transfer to Liquid Metal in a Tube Exposed to a Transverse Magnetic Field
M.A. Gotovskiy and E.V. Firsova

234 Pressure Drop in Eutectic Lead-Bismuth Alloy Flow Through Circular Tubes in a Transverse Magnetic Field
B.F. Gromov, A.K. Papovyants, Yu.I. Orlov, and P.N. Martynov

245 Experimental Studies with a Tubular Liquid-Metal Blanket for the ITNR-ETR-Type Reactor
Ye.V. Muraviyov

265 Neutron and Physical Properties of the Blanket of an Experimental Thermonuclear Reactor
A.I. Kasatkin, V.M. Koren', A.V. Saltykovskiy, and A.M. Shapiro

275 Study of a 1.5 MW Plasma Reactor with a Three-Jet Mixing Chamber
A.L. Mosse, Ye.M. Yermolayeva, and L.D. Kulbatskiy

Number 3

285 Radiative-Convective Heat Transfer in a System of Two Highly Porous Plates
S.A. Zhdanok, S.I. Shabunya, V.V. Martynenko, and V.G. Leytsina
302 Decreasing MHD-Resistance in Channels of the Tokamak Reactor Blanket
A.V. Beznosov and I.Yu. Lyakhov
310 MHD Flow in Complex-Geometry Tubes
V.V. Yakovlev
318 MHD Flow with a Free Surface on the Tokomak Contact Diverter Device
M.Ye. Lebedev, B.S. Fokin, and V.V. Yakovlev
333 Liquid-Metal Film Protection of the Reactor Chamber First Wall in a Pulsed Thermonuclear Reactor
S.A. Berendeyev, V.A. Bernshtam, D.N. Kagan, S.V. Kozyrev, and Ye.V. Poklonskiy
340 Energy Transformation System of the Thermonuclear Reactor Liquid-Metal Blanket
A.D. Alexandrovich, A.P. Beloglazov, and B.S. Fokin
354 Thermogravitational Effects on Liquid Metal Heat Transfer in a Longitudinal Magnetic Field
S.I. Kovalyov and V.G. Sviridov
366 Analysis of a Power Plant with an Experimental Thermonuclear Reactor
Yu.V. Smolkin
374 Phase Change-Type Heat Accumulators from Metal Melts in the Cooling Loops of Thermonuclear Installations
O.I. Demidov, V.M. Koren, A.V. Saltykovskiy, and V.B. Shchedrov
383 Heat Transfer in Accelerating Turbulent Flow Over a Convex Wall
A.A. Khalatov, S.V. Shevtsov, L.V. Syskov, and I.A. Izgoreva
390 Maximum Heat Flux to Antifreeze Boiling in a Two-Phase Thermosiphon
S.A. Tikhonovskiy and I.L. Pioro
398 Drag of Plane Microslot Ducts with Rough Walls
Ye.P. Dyban, N.M. Zotov, and A.A. Khoroshavin
408 Effect of Turbulence Generators on the Critical Dryout Heat Flux Density in Annuli
A.M. Kichigin, S.G. Povsten', and A.V. Ostapenko
415 Determination of the Three-Dimensional Temperature Field on the Spherical Piston Head in a High-Speed Internal-Combustion Engine
M.V. Stradomskiy, V.A. Asmalovskiy, O.N. Vazhenin, V.V. Medyanovskiy, and A.K. Gushchin
424 Analysis of Regenerative Gas-Turbine Cycles
V.Yu. Tikhoplav, I.I. Kirillov, and T.S. Tikhoplav

Number 4

433 Conjugate Problem of Unsteady Heat Transfer in Laminar Flow Over a Plate, Assuming Temperature-Dependent Physical Properties of the Fluid
Yu.I. Shvets, O.I. Didenko, and O.D. Lipovetskaya

440 Influence of Surface Wear on Boiling Heat Transfer
Y.V. Bogdanov and S.G. Obukhov

447 Investigation of Postcritical Heat Transfer for R-12 Forced Flow Through a Horizontal Tube
P.V. Konstantinov and V.V. Yagov

457 Pressure Drop in Steam-Generating Channels
V.G. Antipov

465 Mechanism of Enhancement of Heat and Mass Transfer in a Vapor-Generating Channel with a Transverse Microfin Roughness
Ye.F. Domashev, V.F. Godunov, and G.Ye. Struchenko

471 Dryout Fluxes in Annuli with Nonuniformly Heated Inner Pipes
A.M. Kichigin and A.A. Moskalenko

479 Shell-and-Tube-Side Coefficients in a Helium-Helium Regenerative Heat Exchanger
N.A. Minaylenko, V.I. Usenko, and Yu.P. Vorob'yev

483 Design of Rotor Blades of High-Temperature Gas Turbines for a Specified Service Life and Minimum Loss of Output Power on Blade Cooling
G.P. Nagoga, V.I. Tseytlin, and V.P. Balter

494 Procedure for Processing Experimental Data on Drying
M.S. Smirnov, A.B. Kurzayev, and P.P. Lutsik

501 The Modified Method of Three Temperature and Velocity Fluctuations and Their Correlations in the Thermal Boundary Layer
E.Ya. Epik, T.T. Suprun, and M.L. Pioro

509 Measurement of the Thermal Effect of the Environment
L.N. Stronskiy, A.V. Suprun, and I.L. Spivak

519 Numerical Modeling of Heat Transfer in Irregular Solidification of a Liquid
N.I. Nikitenko and Yu.N. Kol'chik

529 The Mechanism of Vaporization in Reticulate Wicks of Low-Temperature Heat Pipes
G.R. Kudritskiy, Yu.N. Ostrovskiy, and V.A. Antonenko

535 Maximum Heat-Transferring Capacity of Two-Phase Thermosiphons with Separate Vapor and Condensate Streams
I.L. Pioro

543 Critical Flow and Heat Transfer in Field Evaporator Pipes
M.K. Bezrodnyy and Yu.V. Antoshkov

549 Recent Developments in the Theory of Combustion of Gases. A Survey
V.N. Kryzhanovskiy

572 Total Emissivities of Refractories in Vacuum
V.A. Zaytsev, I.V. Gorbatenko, and M.A. Taymarov

Number 5

577 Film Boiling on a Horizontal Surface
V.S. Granovskiy, A.A. Sulatskiy, V.B. Khabenskiy, and S.M. Shmelev

594 Concentrations of Phases and Spectral Characteristics of a Two-Phase Flow in Bilaterally Heated Steam Generating Channels
S.M. Dmitriyev, A.A. Abramov, Yu.I. Anoshkin, M.V. Dmitrousov, and V.Ye. Kulikov

603 Burnout Heat Transfer in Steam Generating Channels under Steady and Unsteady Conditions
I.I. Gromova and V.N. Smolin

612 Limited Heat Loads and Burnout Heat Transfer in One-Sided Heated Channels
V.A. Divavin, V.N. Tanchuk, and A.E. Shrubok

625 Unsteady Thermal Processes Accompanying Transient Flow
F.I. Kalbaliyev, Ch.M. Verdiyev, and F.A. Ragimov

641 Dynamics of Fluidelastic Vibrations of Tube Bundles in Heat Exchangers
S. Kaplunov and N. Makhutov

663 Vibration of Bent Tubes and Rods in Fluid Flow
S. Devnin

670 Dynamics of Burnup of Coal in Fluidized-Bed Combustion
Yu.G. Lekomtseva, V.A. Munts, Yu.N. Fedorenko, and A.P. Baskakov

677 The Effect of Fuel Quality on the Performance of Thermal Power Plants
P.V. Goryunov and N.G. Yanovskaya

682 Improved Efficiency of Utilization of Natural Gas in Heating Furnaces and Reduction of NO_x Emission
B.D. Sezonenko, S.V. Tsvetkov, and V.Yu. Nikitin

690 Thermal Design of Three-Fluid Crossflow Heat Exchangers
V.G. Nosach and V.Ye. Filipchuk

696 Calculation of Heat Transfer in a Tank-Type Glassmaking Furnace with Correction for Selectivity of the Radiation of Furnace Gases
Ye.I. Semikin, A.Ye. Yashin, and V.D. Rumyantsev

703 Improvement of Combustion of Gaseous and Liquid Fuels (A Survey)
V.N. Kryzhanovskiy

Number 6

731 Aeroelastic Instability of the Galloping Type, Developed in Wake Flow
M. Kazakevich, I. Grafkiy, and S. Red'ko

737 Analysis of Dynamic Behavior of a Longitudinal Bundle of Rods in Steady and in Fluctuating Axial Flow
L. Smirnov, V. Prokhorovich, and T. Prokhorovich

745 Heat Transfer from Prismatic Chips Mounted above a Flat Circuit Board
Ye.P. Dyban, E.Ya. Epik, and V.D. Mel'nik

755 Heat Transfer in Turbulent Flow over a Convex Wall in the Presence of a Longitudinal Pressure Gradient
A.A. Khalatov, I.V. Shevchuk, and M.M. Mitrakhovich

764 Hydraulic Drag of Swirled Single- and Two-Phase Flow in Vertical Annular Channels
G.B. Gusev, V.A. Bryantsev, and L.F. Fedorov

771 Subcooled Liquid Pool Boiling Heat Transfer on a Vibrating Heating Surface
Yu.V. Navruov, P.V. Mamontov, and A.V. Stoychev

777 Steam Condensation from a Steam-Air Mixture in Dispersed Water Jets
B.G. Gordon

785 Microscopic Models of Heat and Mass Transfer for Growing Adsorption Films
G.V. Dubrovskiy
796 Rarefied Gas Flow in a Channel with Phase Conversions on Its Surface
V.V. Levdanskiy and Hoang Van Viet
803 Heat Transfer of Smooth and Extended Surfaces in the Zone above a Fluidized Bed
Abbas Failikh Khassan, G.I. Palchenko, and V.A. Dryabin
815 Fluidized-Bed Heat Exchangers Operating with Small-Particle Solids
V.I. Ivanyutenko
821 Heat Recovery from Flue Gases in a Radiative Tube
V.A. Kalitko and N.S. Sharanda
832 Fluidized-Bed Burning of Volatiles and Liquid Fuel Vapors
V.A. Borodulya, V.I. Dikalenko, S.M. Dobkin, and I.I. Markevich
840 Unsteady Cooling of a High-Temperature Surface by Descending and Ascending Dispersed Liquid Flows
L.Ye. Mushegyan, V.B. Yurkovskiy, B.L. Paskar, Ye.D. Fedorovich, M.P. Belokopytov, and V.G. Zatsepin
846 Solid Phase Distribution in the Above-Bed Surface Zone of Fluidized- and Circulating-Beds
G.I. Palchenok and Abbas Falikh Khassan
857 Local Condensation Heat Transfer in Vertical Tubes
A.S. Komendantov, Yu.B. Smirnov, S.G. Avdeyev, and N.B. Smirnova
866 Hydrodynamic Stability in a Four-Channel Test Section of a Steam Generator
R.A. Dulevskiy, Ye.D. Fedorovich, V.P. Ivanov, A.Yu. Postnikov, and B.P. Kotomin

Number 7

873 Steam Quality and Structure of Steam-Water Flows with Local Swirling
G.B. Gusev, V.I. Ivanov, V.A. Brayantsev, and L.F. Fedorov
881 Sound and Self-Induced Oscillations in Film Boiling of Subcooled Liquids
B.M. Dorofeyev
889 Heat Transfer in Boiling of R 717 and R 22 Refrigerants on Multirow Tube Bundles
G.N. Danilova, V.A. Dyundin, and A.G. Soloviyov
894 Simulation of the Temperature Distributions in Cooled Walls of Pyrometallurgical Furnaces
Yu.M. Matsevityy, A.V. Multanovskiy, I.V. El'chishcheva, T.V. Lotsman, and A.M. Roldugin
903 Methods of Cooling Solid-State Laser Rods
A.V. Atamas'
913 Heat Transfer and Critical Heat Flux Densities in Boiling of Water Under a Vacuum on Walls Covered with a Single Layer of Mesh
A.A. Vasil'yev
922 Heat Transfer and Hydraulic Losses in a Slot Duct with Rodlike Turbulence Promoters
Yu.Ye. Dyban
930 Efficiency of Gaseous Film Cooling of a Curved Surface
V.M. Repukhov and T.N. Gorislavets

936 Melting and Vaporization of Metals by a Train of Laser Pulses
R.M. Cherniga and I.G. Odnorozhenko
946 Effect of the Size of Soot Particles on the Spectral Emissivity of a Diesel Fuel Flame
A.G. Plita and Ye.A. Yefremova
951 Heat-Flux Meters for Low-Temperature Research
O.A. Gerashchenko, T.G. Grishchenko, L.V. Dekusha, and V.P. Salo
957 Analysis of Methods for Detecting Dryout and Burnout Fluxes
A.M. Kichigin and I.L. Pioro
965 Numerical Compensation for the Frictional Heat Generated in Inserting a Heat-Flux Probe into the Soil during Brief Measurements of Geothermal Gradients in the Seafloor
A.I. Munitsa
971 Combined Gas- and Steam Turbine Power Plants. Preparation of Steam Turbine Fuel by Reforming of Liquid and Gaseous Fuels in the Gas-Turbine Cycle
A.A. Krivokon
979 Feedback-Controlled System for Supply of Geothermally Heated Water for Space Heating and Household Use
E.N. Malashenko, M.M. Polunin, G.D. Polizo, V.P. Chernyak, and A.N. Shcherban'
984 Kinetic Analysis of the Processes of Evaporation and Condensation on a Surface
A.P. Kryukov
999 Vapor (Steam) Condensation from a Vapor (Steam)-Gas Mixture in a Large Closed Volume
V.A. Kiriyanov
1009 Heat Transfer in the Freeboard Space of a Fluidized Bed
Abbas Falikh Hassan and G.I. Pal'chenok

Number 8

1019 Average Heat Flux Densities in Rectangular Grooves Subjacent to a Turbulent Air Flow
O.D. Zaytsev
1025 Minimization of Icing-Induced Downtime of Circulating Brine-Cooled Heat Exchangers
A.M. Leonkov and S.N. Nesenchuk
1029 Evaporation of a Liquid Droplet on a Metallic Surface in a Pulsating Heated Gas Flow
Ye.M. Ain, A.N. Gribkov, and A.V. Ageyev
1033 Chemical Composition of the Scale on Heat-Transfer Surfaces of an Oil-Fired Boiler with Floor Burners
N.B. Karnitskiy and S.V. Kunkevich
1038 Optimization of Tube Layout in a Staggered Tube Bundles
V.I. Yevenko. A.K. Anisin, and B.V. Poroshin
1043 Two-Phase Flow Boiling Under a Vacuum on Multitube Bundles
V.N. Slesarenko and G.A. Zakharov
1052 Heat and Mass Transfer in Convective Variable-Temperature Drying
Z.Yu. Mazyak and I.N. Il'kiv

1058 Experimental Study of Temperature Distributions in a Thin Plate Subjected to Local Heating
B.S. Bylinkin, Yu.V. Svetlov, and A.A. Vorob'yev
1063 Convective Heat Transfer in Separationless Divergent Channels (Diffusers)
F.V. Vasil'yev and V.T. Buglayev
1068 The Stability of an Oscillating Nonisothermal Flow in an Inclined Channel
K.K. Gabdrakhmanov
1072 Linear Stability of an Advective Flow in a High-Frequency Vibration Field
T.V. Katanova
1078 Heat Transfer and Dynamics of Flow on the Endwalls of Curved Turbine Passages and of Nozzle Rows
A.A. Khalatov, A.A. Kashchenko, and S.A. Khalatov
1089 Quasisteady-State Analysis of Heat and Mass Transfer in Convective Drying
A.A. Dolinskiy, A.Sh. Dorfman, and B.V. Davydenko
1096 Thermocapillary Convection in Rectangular Channels Under Zero Gravity Conditions
Yu.B. Sklovskiy
1102 Coolant Flow Patterns and Crisis Phenomena in Parallel Channels of Nuclear Reactors
V.B. Khabenskiy, Ya.A. Migrov, and V.K. Yefimov
1111 Dryout in Steel Tubes of the Type Used in Steam Generators
Yu.D. Barulin, L.V. Boronina, A.S. Kon'kov, L.L. Levitan, I.A. Orlova, and L.L. Shvarts
1122 Cooling of Hot Steel Blanks in a Water Pool
V.B. Yurkovskiy, A.A. Klimov, and A.A. Prokof'yev
1129 Instability of the Phase Interface and Heat Transfer in Film Boiling
V.S. Granovskiy, A.A. Sulatskiy, V.V. Khalenskiy, and S.M. Shmelev
1138 Temperature Distribution in a Mine Shaft-Rock System, in Which Ice is Used as a Mine Roof Support
Yu.N. Kol'chik and V.P. Chernyak
1143 Methods for Increasing the Time to Dryout Under Unsteady Conditions
Ye.D. Domashev, S.Ya. Portnoy, G.Ye. Struchenko, and T.A. Gur'yeva
1147 Vibration-Aided Boiling Heat Transfer
V.A. Antonenko, Yu.G. Chistyakov, and G.R. Kudritskiy
1152 Determination of the Dripdown Function of Condensate in a Bundle of Horizontal Tubes, and Correction for the Drip Nature of the Condensate Flow
A.V. Klevtsov, Nguen Tiong Tan, and N.V. Chilikina
